Which is better glock 43 or m

Fabric destroyed: 35.58 grams 26.66 grams. It was not for sale, so people could manage it, play with it, and order one. StB410, good job! We compare them side by side, and then we take them to the range and shoot them to see the differences. What are the best guns? When I hear such remarks, I know I'm reading from a person who has little knowledge of guns, or calibers of guns. I chose the Glock for my other kahrs, Keltec, the always great special leader! a&g grip extension kahr, glock 26 gen 4 vs kahr pm9, hickok45 kahr pm9, kahr pm9 bulge, kahr pm9 edc, kahr pm9 frame bulge, kahr pm9 hickok45, kahr pm9 glock 26, kahr pm9 vs glock 36, PM9 vs glock 26 9MM Critical Defense .380 ACP XTP3.00 I brought a G19 for a long time, but I went to the G42 because it is a perfect fit for my hand and fingers. I love my Kahr K9 for IWB, but I wanted to get a CM9 for pocket transport during the summer months. And this is exactly why I have no interest in g42. Also for its small size, the CM9/PM9 are not really pocket-supporting guns, at least for slacks or work pants. If hiding well was not important to me, I would not have brought a great .380. I would carry a .45 (or maybe a nine, even if I currently do not have one). Shooting a 380 is like shooting a gun. Glock did not miss Sig's strategy and Sig's success with P23B -> P938. There was the same kind of hype when the Glock 43 hit the shelves. Here are my current observations: Glock 43 and Kahr PM9! - I prefer the Glock 43 trigger on the PM9. Apparently, in the world of the forum, a .380bucons from the chest. Most tttag readers have enough interest in firearms to become competent enough to handle 9mm recoil. This is a reason why I spent so much time and money on the .380 ammo quest - I wanted to see if there was a way to extract proper performance from that pocket gun, because it is only convenient sooooo. So (I'm going to see if critical defense will perform better from the longest barrel of glock 42 than the shortest barrel of the tcp, in our debut episode, amy jane compares three 9 mm guns. I hate those things on the glock. (insert the obligatory pectoral insert to inflate from 1911 purist fanboy about .45 acp and give crazy claim.) shooting a gun that fits the hand, is easily shot accurately, and has the confidence of the shooter is the best for the individual shooter, no matter what caliber. My wife has a S&W bodyguard because it's her wearing fashionable clothing, this reviewer admits how much when he confesses that xtp turn over penetrate, the biggest advantage of choosing a glock is the fantastic ... if your choices are .380, .32acp, .25, .22 lr or some other moeogun cartridge practically the only ones that have any kind of sense to all are .380 or 22lr I have a glock 48, 43 and I shot at 43x. I have a cw9 (california does not allow me to buy a version cm.) with an extra spin. if you can't find what you're trying to use the navigation category (e.g., however, it was a pretty nasty performer when I tested it from the tcp. What's in my p3at and g42? its only negative side is the trigger dao. and 40sw. a century ago, in compact semi-auto that were thinner and flatterring, and therefore more occultable than a special .38 revolver, there was justification for its existence. it would take somespecific for me to recommend the GLOCK 42 on a 9mm pocket; first, if you need the softer recovery than the largest .380 .380provides (and is a very comfortable, very soft shooter). For many people, the size difference between the micro-380s (LCP, TCP, etc.) and the pocket 9s is the difference between bringing a gun and going without. After all, it is about the same size. Please say hello and thanks to your friend Ex-SEAL for his service; Better still ask him to train. Glock ships with 2 mag and Kahr CW9 ships with one, Glock advantage. However, in the real world, a .380 shot from a pocket gun to 7" YARDS will pass through your typical home door. I bring a Kahr P380 because it's small. It does not seem that the 9mm in the PM9 runs out and leaves the 380 in the glock based on the results. Personally, I carry .380s because they hide well. No matter which barrel you shoot a .380 from, it will not be equal to nine. You entered an incorrect email address! Mass: 115 grains 90 grains Shooting: Glock 42 against Kahr CW 380. Since the context, to me is quite clear, you are significantly better armed with a pocket 9mm than you would with a same size .380, and the longer barrel of the GLOCK does not compensate for the inherent power difference of the 9mm vs. 380 ACP. And if you like the GLOCK and have other GLOCKS and want to keep the consistency in your entire collection, it could be a good choice. There are some times when a light and very thin gun is the answer and .380 happens to fit that niche. It is a handy tad for pocket transport, choose pants accordingly. If you can carry comfortably in your pocket, then it does not offer any advantage on some larger more comfortable guns. In this segment, I'm comparing the G42 performance against a pocket 9 mm gun, the Kahr PM9. The Glock 43 is longer about half an inch, but all three are about the same weight. A 380 will kill a personHow fast and as dead as a 9mm, 40, or 45. I don't support it. Celebrate the freedom of choice. That crown would go to either Kel-Tec PF9, or Diamondback DB9, depending on whether you're looking at weight or thickness. Thank you. There are many reasons why I've selected Critical Defense. And on the PM40 it's like a stick dynamite in your fist! ShootingTheBull410: GLOCK 42 vs. Kahr PM9. If you can do this with the .380, then you have the right tool for the job. It's no doubt a pocket gun. Don't settle for a .380 ACP if you don't want one. When I'm out on a quick commission, when I'm relaxing at home, when I'm out for a ride, or when I'm dressed and I can't hide IWB, the P3AT in a Nemesis holster pocket is what I carry. I don't know. looking at the table above – Yes, the 9mm does a little better in the test. Brand new glock is less expensive with a price of about \$520 with the PM9 at \$650 on average. Sure a good craftsman can smooth and change an action of Taurus TCP and install high visibility poppers for \$200-300 additional at the purchase price. I agree. I have a CM9, but not in my pocket. (Insert the mandatory response on how Glock will release the 9mm soon, followed by accusation that the .380 before so that they can deceive people in buying both). Because he would need a small light gun for her to be able to handle it, but he wouldn't have practiced enough to master any challenging recoil impulse. What do you give up in terms of ballistic performance from G42, compared to a PM9 of comparable size? If you can do this with a hot loaded pocket wheel gun .357, then even better. Also, the release of the slide cuts in my thumb when held with two hands. I had good experiences with Kahrs in the past, although I never possessed or fired a PM9 (although I look at them from time to time). I ambecause I observed my girlfriend has a difficult time racking the slide on a CM9 and I am thinking about thattrace of a larger .380 like the G42 is a potentially less resistant source. It is small, it holds 6+1 and, at least in my hands, it was a very easy shooter. In addition, to each his. The Miu0026P Shield, Kahr Arms PM9, and the new Glock 43. It's a little big, but it will hold any mag without losing blows in your pocket. Compare the size and specifications of Kahr CW9 and Glock G43X Thank you for this article. Also, why did you mention the Walther PPK the reference point for small and compact guns? Follow us onPinterest - - - Usually the A1WB port, the tool shed hides it completely under a well broken shirt. It is actually comparable to my Kahr CW45. They're neither pockets, or both are. It is like comment sections on any Glock 42 posts are on a sort of auto-post system. I think a .380 definitely fills a good niche – it is able to provide a decent shot, and the guns can be tangled with small dimensions that make them almost disappear in a pocket. The Glock 27 on your side offers 180 JHP of grain at almost exactly the same speed as the Glock 42 offers 90 JHP of wheat – about 900-950 FPS. If Glock had gone there, they would have a market 10 times the size of the G42 market. The .380 is an obsolete cartridge. My P3AT, (.77" wide, 8.3 oz.) I have a difficult time recommending 160-190 pounds of foot from a .380 when the 9mm is almost double and the .40 is double or more from a subcompact. At first glance, you will notice that the Glock is slightly more bulky than the ultra-compact Kahr. Instead of pocket carrying your spare mag, which fills it with lint and raw, bought a case of walmart glasses for \$1.98, and the mag flows right into, shape fits your mag and pocket, keeps everything clean and clean. The guard slaps my trigger finger. A .380 and a 9mmboth deadly from defensive distances. If you are not allowed to get a 9x19mm and you want one, one.Take a 9x21mm. However, differences are marginal at best. It is a fortune, he had no idea I would hit him, let alone kill him instantly. My father owns two. The .380 ACP has a lot of sense in certain very common situations. It depends on a number of situations. MSRP: CW9 - \$449 but can be purchased between \$300-\$350; Glock 43 - \$589; Kahr advantage. The PCP or P3AT fits perfectly with that invoice but I found that both are sensitive to ammunition and cleaning. The .380 exists because it is the best of marginalization. The 9mm vs .380 cartridge is about the ability of the shooter to handle recoil. Compared to the size and specifications of Kahr PM9 and Glock G43X LCP continued to bite the finger. I shaved about half an inch from the bottom of my glock 19, bought a pair of glock 26 magazines, and have an easy to hide gun. Fans must have one. I ended up taking a LCP Ruger. So much, that I consider the main benefit of the .380 to be the fact that it provides the opportunity for firearms to be made smaller, lighter, and more-concealable. But even then, we have to consider that penetration is only an aspect of history. Yes, but the difference with the current .380 Glock 42 and the current 9mm CM9/PM9 is that the Kahr is the same capacity and is smaller. With the PM9 I really need to focus on maintaining my view image during the long shot. -The Glock 43 has about a length of the barrel longer than 5" than the PM9. Put those ballistics in your pipe and smoke! I love it! I loved my CW9. The Glock 43 is the last creation of the firearms company. If you choose to go with a GLOCK 42, however, the ammunition selection is more critical than it would be with a 9mm. My P290 (at .90 wide, 20.5 oz. I'm in a class other than most guns, including Kahr. (Insert mandatory comment on how new Glock should have been) here). How would I also make the factor of always important, who shoots first, tends to win... He who shootsBoy in the eye, always wins! Would I bring a pocket.380? We always produce new video content on guns, so make sure of SUBSCRIBE on our ass from YouTube Channel. The barrel factors for Glock 42 striker fired [7.17.] Kahr striker fired PM9 [6.52] and Sig P938 S/A [6.24.] each are quality guns of different action configurations, but the PM 9 looks like \$250 above the price. And third, it was an excellent performer when I tested it by a 9mm short-barrel. Here is a Taurus TCP overlay over 42. Your ability, or its lack, determines how much. The moral of history is getting a gun that always leads and that you can practice with enough to hit what you are shooting. The ammunition selected for this test is Hornady Critical Defense. Send me the following comments by email. Accuracy 1 90gr HP/XTP. Etc also my revolver micro 22mag NAA. Big deep cloak gun. I'm just saying that if you look at what is available in that "weight class" are the only 2 I could see bring. However, the Taurus TCP striker fired [6.00.] has a more complex pattern of parts, documented the power ramp, magazine and quality control issues. For that duty, I have a Kahr P380. However, if the choice is Taurus TCP or nothing; then a PCC is not required. Glock 43 vs Kahr CW9 I have a CW9, PM9 and a CT40, so I know some Kahr flaws I'm looking at a G43 because it's a Glock and I have a G19 so I know they're ugly The big question is the G43 much of an update on the CW9? Glock brought the G42 size 9mm out in 380 for the same reason Apple brought out the iPhone 5C. .380 is much more controllable than a 9mm from a similar sized platform. I don't just like the LCP and LC9 trigger. Secondly, it is extremely popular. The simple rule of thumb is if you are a Glock person – buy the Glock 42 / a person–buy Mr P938 / a boy Kahr – buy the PM9. I just bought an LCP for a reason, fits in any pocket. I'd like to see theG19-carved slide, for the smallest 9 mm practical gun that is still reasonably hidden and reasonably fireable (yet, a G27 slide framed by a G23 frame), but Glock does not press my opinion in such matters. Some want the G19 frame with the G26 slide, others want the G26 frame with the G19 slide, you want a longer view radius with shorter handles, you want the shorter view and longer grips.... Save my name, email and website in this browser for the next time I comment. The hits are cheap and small. if your piece of transport is a small j-frame, buy a package of rubber ammunition strips from brownells or midway for about \$6, and you can charge 8 of .38 spare in one, and slide down into another case of glasses. If you look back in history, 9x19 was mainly used in service guns such as the P38/P1, the Hi Power and the Berretta 92. I think that explains why you see so many passes through with .40s and I think they should lower the standards because of that problem. Its trigger is not optimal, but the practice helps. And my daughter, if she didn't already love her SP101 327. The GLOCK 42 with critical defense delivered 9" penetration, and the Kahr 9mm delivered 12" penetration, with slightly larger bullets-expanding too. © COPYRIGHT 2021. TheTRUTHABOUTGUNS.COM. Using precision Ammunition with Hornady XTP has brought over 13" of penetration from GLOCK (and, I would bet, so would be Fiocchi Extrema, Hornady Custom, or any other of the different XTP bullet loads in .380 ACP). If you are going to use the least effective 380 pocket.380? We always produce new video content on guns, so make sure of SUBSCRIBE on our ass from YouTube Channel. The barrel factors for Glock 42 striker fired [7.17.] Kahr striker fired PM9 [6.52] and Sig P938 S/A [6.24.] each are quality guns of different action configurations, but the PM 9 looks like \$250 above the price. However, the Taurus TCP striker fired [6.00.] has a more complex pattern of parts, documented the power ramp, magazine and quality control issues. For that duty, I have a Kahr P380. However, if the choice is Taurus TCP or nothing; then a PCC is not required. Glock 43 vs Kahr CW9 I have a CW9, PM9 and a CT40, so I know some Kahr flaws I'm looking at a G43 because it's a Glock and I have a G19 so I know they're ugly The big question is the G43 much of an update on the CW9? Glock brought the G42 size 9mm out in 380 for the same reason Apple brought out the iPhone 5C. .380 is much more controllable than a 9mm from a similar sized platform. I don't just like the LCP and LC9 trigger. Secondly, it is extremely popular. The simple rule of thumb is if you are a Glock person – buy the Glock 42 / a person–buy Mr P938 / a boy Kahr – buy the PM9. I just bought an LCP for a reason, fits in any pocket. I'd like to see theG19-carved slide, for the smallest 9 mm practical gun that is still reasonably hidden and reasonably fireable (yet, a G27 slide framed by a G23 frame), but Glock does not press my opinion in such matters. Some want the G19 frame with the G26 slide, others want the G26 frame with the G19 slide, you want a longer view radius with shorter handles, you want the shorter view and longer grips.... Save my name, email and website in this browser for the next time I comment. The hits are cheap and small. if your piece of transport is a small j-frame, buy a package of rubber ammunition strips from brownells or midway for about \$6, and you can charge 8 of .38 spare in one, and slide down into another case of glasses. If you look back in history, 9x19 was mainly used in service guns such as the P38/P1, the Hi Power and the Berretta 92. I think that explains why you see so many passes through with .40s and I think they should lower the standards because of that problem. Its trigger is not optimal, but the practice helps. And my daughter, if she didn't already love her SP101 327. The GLOCK 42 with critical defense delivered 9" penetration, and the Kahr 9mm delivered 12" penetration, with slightly larger bullets-expanding too. © COPYRIGHT 2021. TheTRUTHABOUTGUNS.COM. Using precision Ammunition with Hornady XTP has brought over 13" of penetration from GLOCK (and, I would bet, so would be Fiocchi Extrema, Hornady Custom, or any other of the different XTP bullet loads in .380 ACP). If you are going to use the least effective 380 pocket.380? We always produce new video content on guns, so make sure of SUBSCRIBE on our ass from YouTube Channel. The barrel factors for Glock 42 striker fired [7.17.] Kahr striker fired PM9 [6.52] and Sig P938 S/A [6.24.] each are quality guns of different action configurations, but the PM 9 looks like \$250 above the price. And third, it was an excellent performer when I tested it by a 9mm short-barrel. Here is a Taurus TCP overlay over 42. Your ability, or its lack, determines how much. The moral of history is getting a gun that always leads and that you can practice with enough to hit what you are shooting. The ammunition selected for this test is Hornady Critical Defense. Send me the following comments by email. Accuracy 1 90gr HP/XTP. Etc also my revolver micro 22mag NAA. Big deep cloak gun. I'm just saying that if you look at what is available in that "weight class" are the only 2 I could see bring. However, the Taurus TCP striker fired [6.00.] has a more complex pattern of parts, documented the power ramp, magazine and quality control issues. For that duty, I have a Kahr P380.
